

**Family
Note**

Children need lots of opportunities to practice estimation. You will be pleased to see how their level of accuracy improves with practice.

Guess how many wheels are in your home. Don't forget wheels on cars, bicycles, toys, and vacuum cleaners. Count to see how many wheels there really are. Try using tally marks while you count.

Tally Marks

/ (one)

// (two)

/// (three)

//// (four)

(five)

/// (eight)

Bring a report to school of the number of wheels there are in your home.
