

Family Note

Remember to look around for patterns with children. Patterns are everywhere—in music, nature, language, and art. The more you become aware of their presence, the more you'll find.

Play some music and listen to the beat. Clap to the beat that you hear.

Can you clap and tap your foot to the beat at the same time?

How else can you copy the pattern?

Listen to a pattern and then repeat it.

Clap! Clap! Snap!
Clap! Clap! Snap!

Take turns making patterns using your feet, your hands, and other sounds.
