

**Family
Note**

On Home Link 2, *Collecting Pennies*, you began to collect pennies in a family penny jar. By this point in the year, you will probably have a large number of pennies in the jar. This collection can be an excellent tool for many counting and estimation activities.

Try counting the pennies in your family penny jar for a really big count. Can you think of a good way to help keep track of the total?

Make piles of ten and count by tens.
